ROLEX ADMIN & MASTAN365 EXCHANGE

Client Presentation, Live Demo Script & Technical Integration Blueprint

Date: October 19, 2026	**Version:** 1.0 (Demo Ready)
Primary Portals: Rolex Admin Panel + Mastan365 Exchange	**Module Focus:** Direct Master Settlement & Operations

1. Executive Overview & Two-Portal Architecture

Client ko sabse pehle ye clarify karna hai ki **dono portals ka purpose alag hai** aur dono milkar ek complete high-performance betting operations ecosystem banate hain:

Rolex Admin Panel (Central Operations & Settlement)	Mastan365 Portal (Exchange & Betting Engine)
• **Finance & Banking:** Deposit, UTR manual/auto verify, withdrawal payouts. • **Direct Master Management:** Purchase & Seller party rate settlement, credit allocation, broker/third-party commission calculation. • **Audit & Statements:** Comprehensive A/C statement ledger, client user stats, multi-operator security.	• **Live Betting Markets:** Cricket, Football, Tennis, Casino, Virtual sports odds. • **Market Operations:** Real-time Back/Lay rate depths (blue/pink boxes), suspensions, match result settlements. • **Exchange Downline:** Agent/Client betting accounts, live liability, upline balance (-223 or -718).
Target Flow: Rolex acts as the master financial cockpit. Once verified, chips & points auto-sync to Mastan365.	**Target Flow:** Mastan365 generates market bets and win/loss, which sync back to Rolex statements automatically.

2. Status of Direct Master Management (Tested & Verified)

Aapki screen (Direct Master Management) ka poora automated testing backend aur frontend dono me complete ho chuka hai:

Feature Component	Implementation & Test Status	Client Value Delivered
Exchange & Admin Record	Verified. Dropdown links to Mastan365, Mastan99, etc. Admin name is auto-capitalized and indexed.	Har master account ka exact exchange tracking bina confusion ke.
Purchase & Seller Parties	Verified. Master party table with roles (Purchase, Seller, Third, All). Instant party creation modal.	Kahan se points kharide aur kis party ko distribute kiye, exact separation.
Rate Spread & Profit Calculation	Verified. Auto-calculates **Spread = Purchase Rate - Seller Rate** (e.g., 0.0250 - 0.0200 = 0.0050).	Margin aur profit per point real-time screen par dikhta hai.
Third Party Multi-Commission	Verified. Multiple brokers/third-parties can be added (+ button). Deducts commission from spread to yield **Net Spread**.	Multiple brokers ka commission split bina manual Excel ke accurate calculate hota hai.
Credit Allocation	Verified. Dedicated credit limit field with active/inactive status toggle.	Master ko kitna exposure/credit diya gaya hai uska safe boundary control.

3. Step-by-Step Client Demo Script (Kya Bolna Hai & Kya Dikhana Hai)

Demo dete waqt meeting me ye 4-step sequence follow kijiye. Har step par exactly kya bolna hai aur kya dikhana hai niche detailed hai:

STEP 1: Introduction & Operations Overview (2-3 Minutes)

Kya Dikhana Hai:	Rolex Admin Dashboard, Client List, aur Bank/Payment Accounts view.
Kya Bolna Hai (Script):	*"Sir, humne Rolex Admin ko aapke business ki complete financial backbone ke roop me design kiya hai. Yahan aapke saare clients, operational bank accounts, deposits aur withdrawals centralized control me hain. Pehle jo manual tracking me galti hoti thi, yahan har transaction instant verify aur log hoti hai."*

STEP 2: Deposit UTR Automation & Payout Verification (3-4 Minutes)

Kya Dikhana Hai:	Deposit List, UTR Entry screen, UTR Pending status, aur Withdrawal queue.
Kya Bolna Hai (Script):	*"Jab bhi koi client payment karta hai, operator yahan UTR enter karta hai. System duplicate UTR check karta hai taaki fraud na ho. Ek baar UTR verify hote hi account statement me automatic ledger ban jata hai aur client ka balance update ho jata hai. Same tareeqe se withdrawal payouts ka 2-factor approval flow chalta hai."*

STEP 3: Highlight of the Day — Direct Master Settlement (5-7 Minutes)

Kya Dikhana Hai:	Direct Master Management screen (Add Record form + Live Calculation + Action table).
Kya Bolna Hai (Script):	*"Sir, ye screen humne specific aapke Master Settlement workflow ke liye tayyar ki hai. Exchange select kijiye (jaise Mastan365), Admin ka naam daaliye. Humne yahan Purchase Party aur Seller Party alag ki hai. Example ke liye agar aapne 0.0250 par purchase kiya aur 0.0200 par sell kiya, to system instantly 0.0050 ka spread margin calculate kar leta hai. Agar isme koi third party ya broker involved hai, to '+' dabake unka commission % daal dijiye — system automatic Net Margin derive karke aapko real-time profit figure dikha deta hai. Yahan edit, delete aur active/inactive ka poora control hai."*

STEP 4: Connecting with Mastan365 Exchange (2-3 Minutes)

Kya Dikhana Hai:	Mastan365 panel screenshot / live demo of markets, upline, and downline accounts.
Kya Bolna Hai (Script):	*"Sir, Mastan365 exchange par aapka market feed, cricket odds aur downline chal raha hai. Humara agla step is Mastan365 panel ko Rolex ke sath direct API se link karna hai. Isse aapka balance, client chip deposit/withdrawal, aur match settlements dono taraf automatically bina kisi manual entry ke sync ho jayenge."*

4. Client Se Aage Kya Requirements Chahiye (Technical & Business Checklist)

Mastan365 exchange ko Rolex Admin ke sath seamlessly integrate karne ke liye client se ye exact inputs chahiye:

#	Requirement Category	Exact Detail / Specification Needed	Priority
1	**API Documentation & Postman**	Mastan365 master panel ka Swagger URL ya Postman Collection jisme login, balance, aur market endpoints hon.	**CRITICAL**
2	**Sandbox / Staging Account**	Testing ke liye ek staging master account with dummy points (live production master par test nahi karenge).	**CRITICAL**
3	**Odds Feed Protocol**	Back/Lay odds real-time WebSocket feed (wss://) se aate hain ya REST API polling interval (e.g. 500ms / 1s)?	**CRITICAL**
4	**Wallet Chip Operations**	Client ke exchange wallet me Chip Credit (Deposit) aur Chip Debit (Withdraw) karne ki exact APIs aur payload.	**HIGH**
5	**Direct Master Business Rules**	Purchase Rate vs Seller Rate ka exact spread formula aur broker commission base (spread par hai ya total volume par).	**HIGH**
6	**Upline Field Definition**	Mastan365 top bar par 'Upline : -223' ka exact meaning (downline liability, pending settlement, ya unsettled P&L;).	MEDIUM
7	**IP Whitelisting & Server Access**	Hamare development & production server IPs whitelist karne ka portal/procedure.	MEDIUM

5. Agla Kaam Kaise Hoga (Forward Roadmap & Execution Phases)

Client se credentials aur API docs aane ke baad work execution is timeline ke hisaab se proceed hoga:

Phase	Focus Area	Deliverables & Milestones	Timeline
Phase 1	API Discovery & Handshake	• Sandbox login integration. • Auth token refresh & IP whitelisting validation. • Master balance & upline sync.	Days 1 - 3
Phase 2	Wallet & Chip Automation	• Rolex Deposit approval directly credits Mastan365 chips. • Rolex Withdrawal approval debits Mastan365 chips. • Reversal / failure handling.	Days 4 - 7
Phase 3	Odds & Sports Integration	• Live Sports list (Cricket, Football, Tennis) feed. • In-play match odds & back/lay boxes rendering. • Market status updates (Open/Suspended).	Days 8 - 12
Phase 4	Master Settlement & P&L;	• Direct Master records linking with live exchange volume. • Commission calculations auto-posting to A/C Statement. • Daily/weekly P&L; reconciliation.	Days 13 - 16
Phase 5	UAT, Security & Go-Live	• End-to-end user acceptance testing with client team. • Load testing & 2FA security hardening. • Production launch.	Days 17 - 20

6. Quick Meeting Summary / Takeaways for Client

Key Meeting Pitch:
1. **Rolex Admin** is 100% operational with Client Management, UTR Banking, Statement Ledger, and the brand new **Direct Master Settlement** engine.
2. **Direct Master** accurately handles purchase/seller party rates, margin spread, broker commissions, and credit allocation.
3. **Mastan365 Integration** will bridge the finance hub with live betting exchange operations once the API documentation & sandbox credentials are provided.
4. **Action Item for Client:** Provide Postman Collection / API Docs + Test Master account so integration development kicks off immediately.
